## Notice for JBL Transducer Users

In most cases, the **black** terminal is considered to be the positive terminal. Listed below are drivers with **black** positive terminals (positive voltage to **black** terminal gives outward cone/diaphragm motion):

1400PRO	2105H	2118H/J	2123H	2202H	2206H	2220H
2225H	2226H	2235H	2240H	2241H	2245H	2404H
2405H	2426H/J	2427H/J	2430H	2435HPL	2445H/J	2446H/J
2447H/J	2450H/J	2451H/J	2485H/J	2490H/J	E-Series	G125
G135	LE8T-H	2119H				

As of a few years ago, JBL Professional began manufacturing transducers with the IEC standard of positive to **red**. Listed below are some drivers with **red** positive terminals (positive voltage to **red** terminal gives outward cone/diaphragm motion):

2025H	2035H	2242H	M121-8	M151-8	2012H	2020H
2227H	2406H					

When in doubt, consult the specification sheet for the model in question.
